FACULTY OF HUMANITIES,
EDUCATION AND
SOCIAL SCIENCES

Screening of Student Documentaries & Round Table Discussion

Illuminating placemaking and identity

The event presents four short documentaries produced during the first Spotlight Summer School in Opole in September 2022 by participating students (from Mainz, Luxembourg and Poland among others). The Summer School explored the complexity of identities and how they intertwine with migrant trajectories and the attachment to place. The screening will be followed by a discussion with experts from anthropology, human geography and sociology who were involved in organizing and running the Summer School.
